#### **EXPERIENCE**

2017 - 2021

# Accenture Strategy | Business Strategy Manager

#### **Product Design**

o Led product planning and design of chatbot assistant for US cable client through customer journey prioritization and conversation flow design (e.g., entry/exit criteria, branching logic, API references, technical requirements)

## **Process Design**

 Designed the process by which internal data sources were used to calculate revenue share for global media client's video streaming service; identified data sources and elements required to fulfill contractual deal terms and developed visualization of proposed end-to-end data flows required to support reporting design

# **Product Management & Strategy**

- o Analyzed the end-to-end customer lifecycle strategy and performed product assessment of US cable client's consumer media streaming device to make recommendations on improving product engagement and sales
- Managed development of an audience targeting application for US cable client's advanced advertising group, interfacing between engineering groups and business stakeholders to define product requirements and prioritize feature sets across a two-year roadmap

2016 - 2017

**IBB Consulting Group** | Consultant (acquired by Accenture Strategy: Nov 2017)

## Strategy & Growth Planning

 Performed opportunity analysis, financial modeling, and growth planning for monetization of internal commerce & affiliate marketing platform for US publisher client; collaborated with product leads across business units to develop capability mapping of existing features on commerce platform to inform roadmap development

#### Product Planning & Portfolio Management

 Provided support for US cable client's ad tech division towards development of campaign planning product; defined business requirements for minimally viable product features, produced extensive user story backlog, and assessed roadmap against product portfolio of recent acquisitions; conducted top-down market sizing analysis to identify major growth areas and make recommendations towards portfolio consolidation

2014 - 2016

#### IBM Global Business Services | Consultant

## Go-to-Market Strategy & Data Analysis

 Built analytical model to transform go-to-market strategy for global technology client by segmenting existing client base and refining resource requirements across business units; led data-driven workshops for senior executives across Asia and Latin America to receive regional inputs for model, which were used to conduct analytics to support executive decision-making

### **Product Development**

o Worked with a global retail client to develop a machine learning-based application using Watson Analytics that forecasts product demand based on unstructured data sources; work resulted in successful proof-of-concept demonstration of predictive analytics model

# **EDUCATION**

2010 - 2014

New York University | Leonard N. Stern School of Business

Bachelor of Science: Marketing, Management
